

Latin American Modal Split in International Transport – Year 2006

Mexico

Ricardo J. Sánchez
Gordon Wilmsmeier
Gabriel Pérez S.
Marc Hesse

This electronic document was prepared by Ricardo J. Sánchez and Gabriel Pérez S. Experts of the Infrastructure and Transport Area of Natural Resources and Infrastructure Division of UNECLAC, Gordon Wilmsmeier, Senior Research Fellow of the Transport Research Institute (TRI) Napier University, Edinburgh and Marc Hesse, UNECLAC Consultant.

This document contains detailed tables and charts about international transport flows to and from ten Latin American Countries covered by the International Transport data Base (BTI) of UNECLAC. It includes unique information about the use of transport modes in international trade, cost of international freight and insurance and the traded commodities. Data is annual, for the year 2006, and grouped by Standard International Trade Classification (SITC) codes.

The opinions expressed in this document, which has not been edited, are those of the authors and do not necessarily coincide with those of the Organizations.

Notes and explanation of abbreviations

The abbreviations "n.a." or "n.d." indicate that the item in question is not available.

The abbreviations "LAC" or "Other LAC" correspond to Latin American countries and Other Latin American countries, respectively

Reference to "tons" mean metric tons, and to "dollars" United States dollars.

Individual figures and percentages in tables may not necessarily add up to the corresponding total, because of rounding.
